

What Customers Say

Mireille

Since I am using the Protect Disc on my iPhone, it seems that my life has changed. I keep usually my phone on the left pocket; I had started to feel a strange and bad energy hurting my leg constantly, blocking the lymphatic system and affecting my blood circulation. In less than one minute following the application of the PROTECT disc, that pain left and never came back I knew that the Disc was good. I did not know at that point it would benefit my physical body. Since that time, I tell everybody about it; we all need this type of Disc. No reason to use other discs before we protect ourselves against harmful rays. The PROTECT is an efficient and easy solution. Please tell your people, sell it give it as a gift, find your way to expand the use of such disc as a priority in life. Because Life is unique and precious, and so the PROTECT discs are. ! Thanks!

An Extraordinary Product

Guard Against EMF From

- Cell Phones
- Bluetooth Headsets
- Wireless phone handsets
- Computer monitors
- Tablet computers
- TVs
- Microwave ovens
- Other electronic devices

Stop Playing EMF Russian Roulette

The Protect Disc is the perfect product for anyone that wants to avoid playing Russian roulette every time they use a cell phone or other electronic device. Today, research indicates there may be significant damage from EMF radiation... including brain cancer from using cell phones. The danger is greatest for young people. They use cell phones to talk and send text messages all the time... and the more you use your cell phone the more you're at risk.

In addition, think about how many hours you spend sitting in front of computer screens or watching TV. They're a source of EMF radiation too. Why take a chance with your health or your children's?

Why You Should Be Concerned About EMF

Researchers believe that the microwave radiation from cell phones interacts with the water in your brain to create electrical vortexes, and research shows that EEG signals are significantly changed when you use a cell phone, even if you just carry it. Studies have also shown that cell phones can heat your brain just like a microwave oven heats food.

Many people think shielded bags, patches and holsters for phones are protecting them. Those products really don't protect you when you're talking on the phone... and that's when it's most important. They only change the amount of radiation reaching you when the cell phone is in the bag or holster. As soon as you actually use the phone they stop working. So, what's the point of using them?

But cell phones are only one source of EMF radiation. We are bombarded by EMF 24 hours a day 7 days a week.

How To Use The Protect Disc

Protect Discs directly impact the body. Even so, their most effective use is not to wear them on the body. Instead, the best practice is to place them on the electronic device that generates the EMF so that they will be near the body whenever you use the electronic device.

Ordinarily, cell phones represent the greatest EMF dangers. Consequently, an ideal placement for a Protect Disc is on the cell phone itself. There are several possible options. Stick the Protect Disc to the back of the cell phone. If you have a cover for your cell phone, stick the Protect Disc on the inside of the cover so that it is between the cover and the phone. Open the cell phone and stick the Protect Disc to the cell phone battery.

For the most effective EMF protection, use the Protect Disc on all your electronic devices. At the same time use the related Body Protect Disc on your body.
