What Our Customers Say

"...Before she started using the Disc she was having a lot of hot flashes and mood swings... and mental clarity wasn't that good. Afterwards, actually 20 minutes afterwards, I could start to tell the difference in how she felt. She's using the 3 [days] on and 1 off [protocol] and has very limited hot flashes that aren't nearly as severe as before. Memory and thinking is clearer. Mood swings are gone. As soon as she started using it she could tell a really big difference." -Janet Berthelot

"From the moment I began wearing it, I could see and feel the difference in the way that my skin looked. Immediately, I could see a brightness in my face. I can see a glow that I haven't seen in a long time... my friend asked what I had done to my face."
