

What Customers Say

Jeff

At first, I had my doubts about the harmful effects of EMF, but my wife encouraged me to give the Body Protect Discs a try. She had already put Protect Discs on my cell phone and iPad. At first, I didn't notice much, but after a few days of use I noticed that my mood seemed much lighter. I have had the problem of mild depression on a frequent basis, and I noticed that it seemed to go away. Plus, I felt more energy and an underlying lack of stress. I don't understand what these Body Protect Discs are doing, but I know that they're doing something that makes me feel a lot better.

Additional Information

Additional information about how to use Protect Discs may be found by scanning the QR code at the right or by visiting the website:

An Revolutionary Product

The Science is Compelling

Today, there is strong scientific evidence that EMF can cause damage at the cellular level to some fundamental biological molecules. While cell phones, portable phones and wi-fi devices are the most significant culprits in causing cellular damage, research has repeatedly shown that EMF of all frequencies can disrupt the sodium, potassium and, particularly, calcium channels in cellular biology. In fact, cells have been shown to produce certain reactive proteins in response to EMF stresses placed on them.

The harmful effects of high energy ionizing EMF like gamma rays and x-rays have been known for a long time. Current research shows that similar damage can occur from exposure from much less energetic EMF, particularly over time. Even very weak electromagnetic fields can result in cellular disruptions and the generation of free radicals. Numerous studies have shown effects including oxidative stress, single and double strand DNA breaks, damage to the blood-brain barrier, male and female sterility, and even cancer resulting from the downstream effects of basic EMF damage at the cellular level. Plus, the cellular impacts of EMF can affect the production of many neurotransmitters, resulting in psychological effects like depression. This is particularly the case in people who have Electromagnetic Hypersensitivity (EHS).

Even though you can't see or, in many cases, feel the detrimental influences of EMF, they are producing adverse reactions on your body, and the reactions you do see depend on your own particular sensitivity to EMF.

Repair EMF Damage From

- Cell Phones
- Bluetooth Headsets
- Wireless phone handsets
- Computer monitors
- Tablet computers
- TVs
- Microwave ovens
- All other EMF sources

BodyProtect Reverses

Cellular Level EMF Impacts

The BodyProtect Disc has been designed to reduce and even repair the basic destructive impacts of EMF at the cellular level. This can inhibit or even reverse the downstream EMF effects in your body. This has an immediate and long term benefit for your body. So, why play Russian Roulette with your health from exposure to EMF radiation of all kinds?

How To Use The BodyProtect Disc Unlike its larger cousin, the Protect Disc, which is designed to be placed directly on devices that are sources of EMF like cell phones, wi-fi tablets and computers, the BodyProtect Disc is designed specifically to be placed directly on your body. The BodyProtect Disc is not negatively impacted by heat or cold, and water won't damage it.

Peel the BodyProtect Disc off its protective backing and place it on the location shown to the left. Be certain the skin is clean and free of oil and lotions. The Disc will not stick well to hair, so be sure to shave off any hair that might prevent adhesion.

Getting The Best EMF Protection

For the best EMF protection, use the BodyProtect Discs on a daily basis. The ideal use is to wear a Disc for 2 consecutive days, then not wear a Disc for 1 day. Repeat that cycle continuously.

Increase the effectiveness of your EMF protection by putting a larger Protect Disc on every electronic device you use like cell phones, tablets, computers, portable phones, baby monitors, etc.
